

GENERAL REQUIREMENTS FOR CARS AND DRIVERS

Schedule R - Requirements for all Rally Cars

1. PREAMBLE

- (a) Portions of the previous schedule r have been incorporated into other sections of the cams manual of motorsport. All vehicles must comply with schedule a (refer to “general requirements for cars and drivers” in the cams manual of motorsport), this schedule as well as appropriate sections of the rally/road section of the cams manual of motor sport.
- (b) Each vehicle must be registered for use on public roads with an appropriate government authority, or be subject of a vehicle permit issued by an appropriate government authority, which authorises the vehicle’s use on public roads and must be covered by a policy of third party insurance. The engine and chassis numbers must agree with those shown on the certificate of registration or permit. It is the Competitors responsibility to ensure compliance with the Government regulations for the State or Territory in which the vehicle is registered or the vehicle permit is issued. All lamps must comply with the Government regulations for the State or Territory in which the vehicle is registered.
- (c) Signs and advertising are permitted on vehicles unless specifically prohibited in Supplementary Regulations. The requirements of NCR 155 and Schedule K (refer to “General Requirements for Cars and Drivers” in the CAMS Manual of Motor Sport) must be observed.
- (d) Additional fuel tanks of free but safe design may be fitted outside the passenger compartment and must be vented to the outside of the vehicle. If the design of the car makes fitment outside the passenger compartment impracticable, eg, Ford Laser, it is permitted to fit the tank in that compartment provided that the filling orifice and ventilation are outside that compartment regardless of vehicle construction (see also specific Group Regulations).
- (e) On cars in which the fuel tank is either fitted as standard, or has been relocated, in the passenger compartment (ie, the rear of a hatch back) and/or has been relocated in the luggage compartment of any type of body-work configuration car.
 - (i) the fuel filler must be constructed so that any fuel spilled may drain safely to the outside of the vehicle,
 - (ii) if the filling orifice is located within the bodywork, it must be fitted with a catch tray to the satisfaction of the scrutineers,
 - (iii) a flame and liquid proof bulkhead, which may be of transparent material and which effectively separates the compartment occupied by the crew members from any component of the fuel tank or refuelling system must be fitted.
- (f) If additional fuel containers which are not part of the piped fuel system are carried, they must be securely fastened to the vehicle structure, but not within the passenger compartment regardless of vehicle construction.
- (g) General appearance and presentation of vehicles must be of a neat and well finished standard.
- (h) Vehicles shall be fitted with a laminated windscreen. Windows tinted with a film which complies with the state vehicle regulations in the relevant state may be used. The use of film which complies with the provisions of Article 253.11 of FIA Appendix J is mandatory for international events and permitted in ARC events.
